WATER TOUCH SERIE

TRUSOL[®] CASA

WATER TOUCH SERIE | QUARTZ STONE

6 and 12 mm thin quartz stone from an Italian company named ARIOSTEA, inspired us to create the series of the bathroom elements for example, countertops, freestanding basins, basins, and bathtubs are made by using stone cladding production. It can also be applied to the wall and the floor. The outcome of this made the bathroom look spectacularly beautiful with the color, texture, and pattern of the originate 'WATER TOUCH' quartz stone.
